Subject: Re: Fw: Analytical Request for Dimock - July 2012

The method and QL for Mn is correct in the ARF, the TAT is not. Emails from Kelley Chase state a 7 day TAT requested not a 3 day TAT .

The other two DOCs list all parameters and QLs not just Mn.

Hi Kevin -

I was just told that we will **LIKELY** be given permission to conduct limited sampling at the two Carter residences (HW-8a and HW-8b), which share one well, to evaluate whether the existing treatment system is addressing the elevated manganese. Assuming we are given permission to sample, I understand that we will only be running the analysis for manganese. A total of three samples would be collected (one wellhead and two taps). QA samples would also be collected, as necessary. We would be looking for lab-validated results within 7 days of receipt of the samples.

Again - we still don't officially have the "green light" Hopefully this will be resolved today or tomorrow. I will get back to you ASAP to confirm the plans and schedule for sampling. Please contact me with any additional questions.

Thanks - Kelley

Since Kevin is out would you take a quick look at these documents to ensure that the right method and QLs are included and that is consistent with our understanding of Round 3?

Subject: Analytical Request for Dimock - July 2012

Dan/John,

Attached is the analytical request for the July 2012 sampling at Dimock which is scheduled to begin next week. The analyte/QL list and approved sampling plan are also attached.

Thanks,

Suddha Graves
